

Aggressive Vacuum

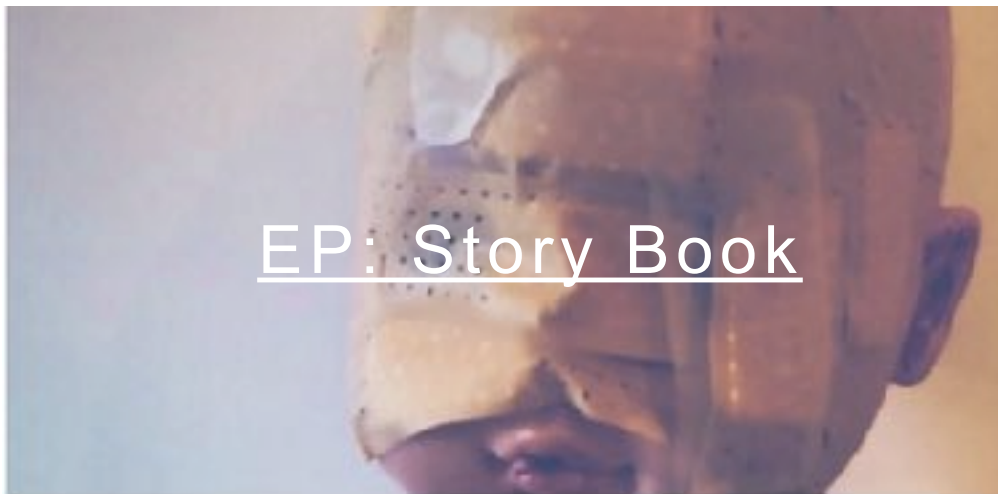

Electronic Music, Experimental Music

Aggressive Vacuum is an independent musician impacted by all kinds of music. To fully express all the ideas, emotions and feelings, Aggressive Vacuum's composition and arrangement are unlimited. Those expressive works build up strong atmosphere of icy, dark, mystic but also innocent feeling. Many sound and musical experiments were done in Aggressive Vacuum's music. All kinds of sounds can be used as instruments and there are always many distinct elements combined together in a very creative way. However, being experimental is never the real purpose. The idea of the musician is that any sound can be regarded as music because it's all just about definition. And everything done in Aggressive Vacuum's music is only for expressing those unspoken and deep perceiving. Being true and honest in the music is the most important thing in composing.

Aggressive Vacuum also works on literature for many years. Music is the supplement of expression while music and literature can never replace each other. Music composed by Aggressive Vacuum usually provides a story telling feeling. As the inspiration and composing are generally based on instinct, the contents in Aggressive Vacuum's music are not certain and clear stories. It is the soliloquy of the musician.
